## **Correction TD10 – Groupe 2**

## Exercice 1:

A et B -

C-

```
private static void tribulle(int[] t) {
    int i=0, j, tmp;
    boolean swap = true;
    while (i<1.length && (swap == true)) {
        j=1;
        swap = false;
        while(j<1.length-i) { // échange des paires d'éléments mal ordonnés
        if (t[i]<t[i-1]) {
            tmp=t[j];
            t[i]=t[j-1];
            t[i]-1]=tmp;
            swap = true;
        }
        j++;
    }
    i++;
}</pre>
```
